WELCOME TO EXPRESSO

EXPRESSO's manual and powered transport & handling equipment simplifies and optimises work procedures worldwide. They are used wherever future-oriented, efficient, and individual logistics are required. All our products are manufactured using a modular system, enabling us to provide individual, customer-specific solutions. Since 1953, our products are highly convincing, thanks to their safety features, quality, ergonomy, and precise workmanship. Their long service life and permanent availability underline their outstanding economic advantages.

MANUAL HANDLING EQUIPMENT AND TRANSPORT SYSTEMS

This Competence Catalog for manual handling equipment shows you a representative selection from our current product range. You are also welcome to specify your individual handling or transport task, for which we can find an optimum solution in close cooperation with you. We look forward to hearing from you.

THE EXPRESSO TEAM WILL BE HAPPY TO WORK TOGETHER WITH YOU.

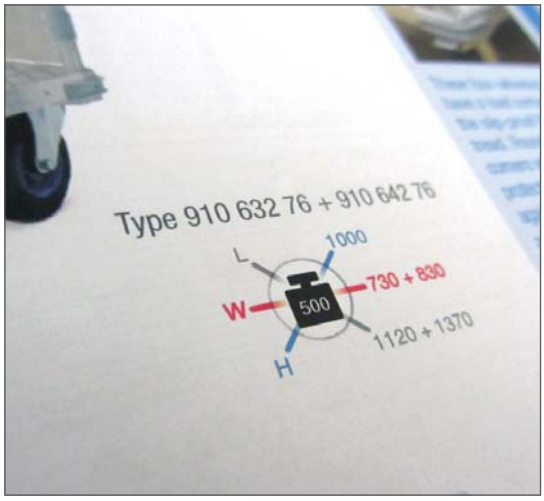

THE MOST IMPORTANT INFORMATION IN THE "IN-FOCUS"

In addition to the equipment, the In-Focus contains a brief overview of the most important basic technical information. Additional information is listed in the Technical Primer by topics and in table form.

THE INFO BOXES

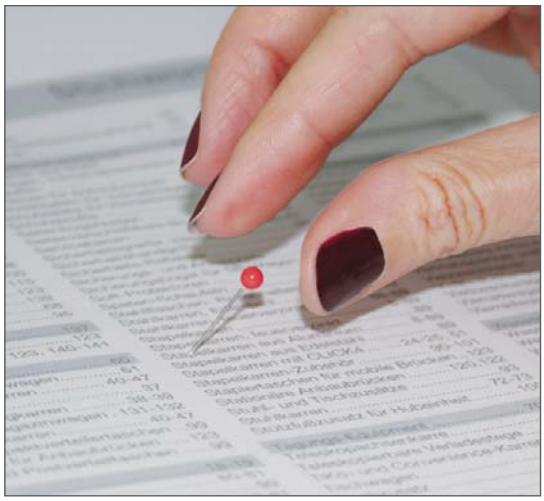

Our info boxes always provide specific details, tips, or cross-references to related material handling products or topics, such as safety, efficiency, and quality.

GLOSSARY

Finding instead of searching! For your convenience, a glossary is located on pages 142 to 147. We will also provide you with detailed advice over the phone or will respond to your questions by e-mail.

EXPRESSO DEUTSCHLAND GMBH

EXPRESSO DEUTSCHLAND GMBH

WELCOME TO EXPRESSO – YOUR TRADITIONALLY INNOVATIVE PARTNER

For more than 60 years we have been supporting people worldwide with solutions for handling valuable and heavy goods. In close cooperation with our customers, we develop individual and professional products for use in trade and industry. Our high-quality manual and powered transport equipment and goods handling solutions close the gap between manual labour and the use of forklift trucks. They increase the efficiency of work sequences because they simplify, assist, and accelerate operations. Hereby, supporting the health of working personnel is a central theme during every product development.

OUR DRIVING FORCE IS THE PERSON, NOT THE MACHINE.

Our innovative products make a lasting contribution to improved ergonomy and higher efficiency of the equipment used, as well as helping to maintain employee health. Hereby, environmental aspects are taken into account with every decision. Energy and raw materials are used efficiently and in accordance with ecological considerations, thus helping to preserve our environment.

EXPRESSO – YOU CAN HANDLE IT

The use of ergonomic handling equipment represents an elementary relief for workers, and ensures a uniform working speed. This supports personnel well-being, which also benefits the company, because: “Only the best is good enough for employees”.

QUALITY FROM GERMANY – AVAILABLE WORLDWIDE

Since 1953 we have been developing and manufacturing branded products that are unique in design, construction, and production. Our modular system permits us to design specific solutions that are precisely matched to our customers‘ applications.

Every product in our comprehensive range is highly convincing thanks to its safety, quality, and precise workmanship. Long service life and permanent availability underline the outstanding economic advantages.

Our quality management system makes sure that the uniform high product quality is maintained. EXPRESSO is certified to the DIN EN ISO 9001.

HEADQUARTER

EXPRESSO Deutschland GmbH is headquartered in Kassel. This central location in Germany ensures easy access by road and rail, as well as fast and flexible logistics.

SUBSIDIARIES

With subsidiary companies in France, Austria, the Czech Republic, and Singapore, EXPRESSO serves its customers throughout Europe and in East Asia – directly, in accustomed perfection, and with optimum service.

SALES PARTNERS

With sales partners in more than 30 countries, we are able to sell our quality products all over the world.

ERGONOMY AS MOTOR FOR EFFICIENCY

Employees are the most valuable asset of most companies, and preserving their health has an immediate positive effect of productivity.

Although humans are able to perform many kinds of physical work – every day and for long periods – but a time always comes, when such work involves a risk to health. Ergonomic working aids prevent these risks. They help to avoid accidents, injuries, and absenteeism due to sickness. Thanks to optimised and safe working conditions, employee health becomes a long-term productivity factor.

Therefore, an investment in ergonomic handling equipment not only provides relief for the workers, but also ensures a uniform working speed. For the benefit of employees, and for the benefit of the company.

OCCUPATIONAL SAFETY

By using our safe and high-quality working equipment, safety and health hazards for employees can be reduced significantly. What‘s more, the use of this equipment complies with the legal regulations for safety at work.

ERGONOMICS

EXPRESSO products help you to arrange the working conditions in your company in such a way that the work results are optimised. Because we attach great importance to user-friendliness, the improved “man-machine interface” results in relief for your employees.

PRODUCTIVITY

If strenuous work can be carried out by every employee, this increases flexibility when deploying your workforce. This helps to optimise your workflow, and increases productivity.

EXPRESSO – YOUR COMPETENCE PARTNER FOR TRANSPORTING, LIFTING, AND HANDLING

EXPRESSO is a premium manufacturer for industry, logistics, and trade. Apart from universal branded products that are in reliable service worldwide, we also offer unique, individual solutions for every location where goods must be moved or handled. Our activities are divided into three product groups and one service group:

CLASSIC: MANUAL HANDLING EQUIPMENT

These intelligent products are designed to assist your manual work, and to make goods handling safer, easier, and more efficient. They include:

Hand trucks: Unrivalled in terms of handling, quality, and individuality, EXPRESSO's hand trucks have become firmly established worldwide in countless sectors.

Four-wheel carts: Large loads can be transported efficiently, ergonomically, and safely with our four-wheel carts.

Baggage cart systems: Thanks to their outstanding functionality, quality, and efficiency, EXPRESSO's baggage carts and customised depot systems provide reliable service in airports and railway stations worldwide.

DYNAMIC: POWERED HANDLING SYSTEMS

The powered solutions in this group are intended for effortless lifting, handling, and moving goods of all types.

lift2move: This mobile lifting aid is particularly suited for lifting and moving individual goods, parcels, and equipment from one place to another.

Multi-Performance Lift: This universal, precise lifting aid can be fitted with a wide range of load handling attachments for all standard handling operations.

BalanceLift: Effortless load handling without electric power thanks to a vacuum-operated lifting cylinder with customised load handling attachments and grippers operated mechanically or with compressed air for different goods.

touch2move: This ingenious drive unit with sensor handle technology serves for the precise control of the most varied transport systems.

Compact LEO tugs: It combines EXPRESSO's unique, patented touch2move drive units with the principles of powered ground transport equipment using tiller handle control.

EXPRESSO PRODUCT DIVISION

The demands placed on working equipment are just as individual as the persons using them. Regardless of whether the equipment must be application or user-oriented, or both – EXPRESSO offers a perfect solution for every need.

LOGISTIC: LOADING TECHNOLOGY

Our extensive range of loading technology equipment provides everything that assists, simplifies, and makes vehicle loading/unloading safer. The range includes products that can be stowed in a vehicle, as well as solutions for loading ramps. In the latter case, our engineers will develop an optimum, individually tailored solution to suit the situation on site. All products and solutions are featured by top quality, long service life, and utmost safety.

Loading ramp safety: Safety on loading ramps is ensured by special wheel chocks, signal lamps, the STOP TRUCKS truck immobilizer, barriers, guide rails, and safety supports & chocks.

Loading systems: Our loading systems include ramps, levellers, platforms, dock boards, dock plates, mobile dock boards, gate seals, ramp buffers, as well as wheel ramps and lifting devices.

EXPRESSO SERVICE

Safety inspection: Accident Prevention Regulations require that working equipment is subjected to regular safety inspections. On request, EXPRESSO service technicians carry out the necessary inspections on your premises.

Maintenance: On request, EXPRESSO service technicians carry out the necessary maintenance work on your premises, including the replacement of worn parts. During maintenance, the service technician also makes sure that the equipment is in good working order. Any damaged or worn parts replaced immediately, thereby putting the equipment back into its original functional condition.

Maintenance contracts: This comprehensive service concept for maintenance, service, and customer care for our powered handling equipment ensures that the equipment has a long service life, and your operations always run smoothly.

Original EXPRESSO spare parts: Should a damaged or worn part have to be replaced, every component is also available as a spare part. On request, an EXPRESSO service technician will carry out the replacement on your premises.

HAND TRUCKS

OUR ALUMINIUM HAND TRUCKS ARE AS UNIQUE AS YOUR MATERIAL HANDLING NEEDS

For more than 50 years, EXPRESSO aluminium hand trucks have been successfully employed by professional users in industries such as the beverage and food industries, at package services, and generally as vehicle support carts.
More than 2,000 hand truck types generated by the modular system are available immediately. Users world-wide are compelled by their component variety, such as various footplates, handles, heights and widths, and the original spare parts service. Their high strength, incredibly long service life and consistent availability underscore their high economic benefit. Our brand-name products – made in Germany – provide the reliability, quality, and precision workmanship that you need for professional material handling.

YOUR NEEDS DEFINE OUR PRODUCTS

This is our philosophy – field-tested and in alignment with your needs. For instance, your specific material handling task can be solved ergonomically and effectively with practical accessories for hand trucks. By adding premium accessories, an allrounder hand truck is converted into special purpose equipment. Starting on page 104, we provide you with detailed information about our extensive product range of hand truck accessories.

MANUAL HANDLING EQUIPMENT FROM PROFESSIONALS FOR PROFESSIONALS

The following pages contain information about ergonomic, light-weight, aluminium material handling aids that simplify moving goods. The equipment was developed in close collaboration with our customers, and have proven themselves world-wide for decades.

We have the right manual handling equipment for you – for certain!
The requirements for supporting equipment are as unique as the people who work with these. Regardless of whether the supporting equipment needs to be application or user-oriented (or both) – EXPRESSO has the ideal solution for any need.

OUR BRANDED QUALITY HAS A PROVEN TRACK RECORD WITH MILLIONS SOLD WORLDWIDE

OUR QUALITY HAS HISTORY

Our equipment has a proven track record developed since 1953 due to its safety, quality, and precision workmanship. Its long service life and consistent availability underscore its high economic benefit. Your EXPRESSO benefits are:

- an internal, unique EXPRESSO quality and safety standard
- tangible and enduring premium quality
- immediately usable equipment that is accurately and fully assembled, and delivered by professionals
- premium materials and workmanship – made in Germany
- incomparably long service life
- precision and individuality down to the last detail
- configurability and special purpose accessories for ideal solutions
- a step ahead in terms of ergonomics and efficiency
- optimised, ergonomic procedures

ALUMINIUM – 50 % LIGHTER AND STRONGER

For decades, EXPRESSO hand trucks have been made from a particular, high-strength special aluminium alloy, and are therefore 50% light and significantly stronger than steel. The elliptical aluminium tube used on hand trucks frames is reinforced in the primary load area, providing maximum strength even at extreme loads.

WE SET THE STANDARD FOR OTHERS TO FOLLOW!

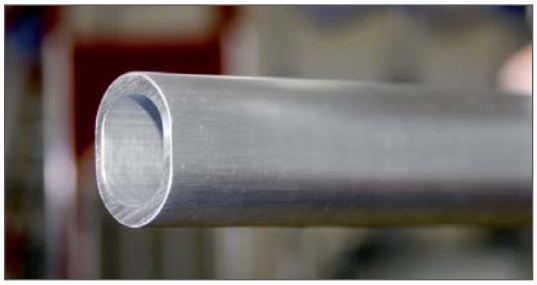

PREMIUM, FIBERGLASS-REINFORCED CROSS MEMBERS

High safety standard due to positive connections to the special-alloy upright. The upper cross member is used as the handle, e.g. for transporting over stairs.

ELLIPTICAL ALUMINIUM TUBE MADE FROM SPECIAL HIGH-STRENGTH ALLOYS

Elliptical aluminium tube frame made from special high-strength alloys for high stability and load-capacity, reinforced in the primary load areas – 50% lighter than steel.

ACCURATELY FITTING, PERMANENTLY PROTECTED SAFETY CONNECTIONS

The structure is permanently reinforced in the primary load area with high-strength fiberglass-reinforced angle brackets or with twin stainless steel brackets.

SLIP-PROOF TREADS WITH WEAR INDICATORS MADE FROM EXLAN PLASTICS

As special protection for the angled aluminium skids and to gently climb stair steps. The integrated red core shows the level of wear of the skid; replaced in seconds with the clamp system.

CURVED THROUGH-AXLE (25 MM DIAMETER)

The curved shape facilitates tilting of even heavy loads and prevents the foot from slipping. The curved axle is standard equipment on all wheels with a diameter of 260 mm.

WE HAVE THE RIGHT HANDLING EQUIPMENT FOR YOU – FOR CERTAIN!

Not conventional – but tailored! No off-the-shelf cart can do everything for everybody. Instead, your logistics task defines the appearance and functionality of your professional equipment. EXPRESSO's modular kit philosophy has provided access to unlimited options to configure application and user-specific material handling solutions since 1967.

MORE THAN 2,000 HAND TRUCKS ARE IMMEDIATELY AVAILABLE FROM THE ALUMINIUM MODULAR SYSTEM

The enormous selection of premium quality components, such as various heights, footplates, wheels, skids, and handles is instrumental for making customised, application-driven manual handling equipment a reality. Rigid equipment designs restrict the options for use and result in high costs for maintenance and service. And there is never a problem if a wear part ever needs to be replaced! Each individual part is also available as a spare part.

EXPRESSO ORIGINAL SPARE PARTS SERVICE

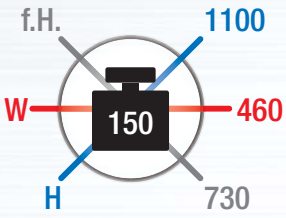

Our equipment is subjected to rigorous quality inspections. However, if a wear part ever needs to be replaced you can rely on our spare parts service. This keep the material handling equipment in top shape, and increases its service life dramatically. You are provided with purchase order sheets with all individual parts for much of the equipment in our hand truck product range. Simply submit your purchase order by e-mail, fax, or telephone.

Note: For safety reasons, you should only use EXPRESSO original spare parts!

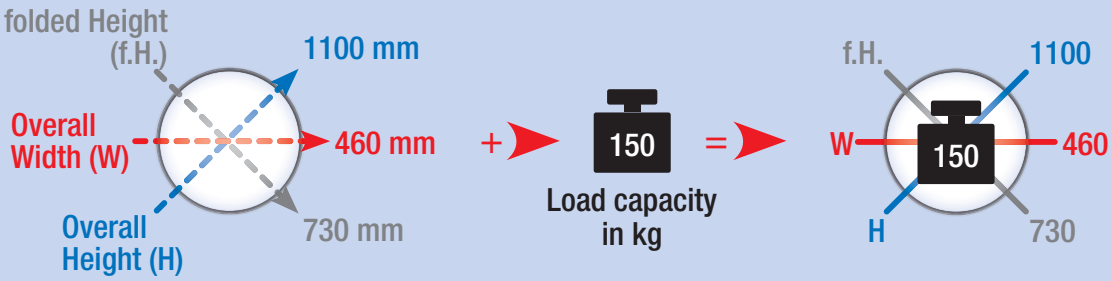

THE ORIGINAL MADE IN GERMANY

THE MOST IMPORTANT TECHNICAL INFORMATION PARTICULARLY EASY TO READ IN THE “IN-FOCUS”

IN-FOCUS CONFIGURATION

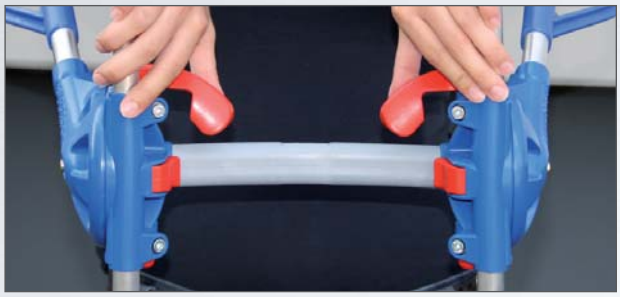

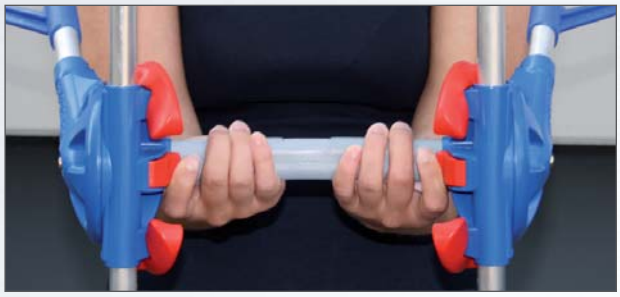

The In-Focus shows you the most important technical specifications for various hand trucks at a glance: load capacity, width and height, or folded height. Additional information is available in the Technical Primer.

ADJUSTED AND CUSTOMISED IN SECONDS

Do you prefer a stacker with safety handles that are arranged particularly far up or further down? Is your colleague shorter or taller than you, and you both still need to use the same cart?

Whatever your preferred grip may be – the handle goes CLICK and you have adjusted to your specific setting within the blink of an eye. And that is also its name! This patented handle design is based on our most important utility item – the car. The height-adjustable steering wheel and individually adjustable seats play the same role for passenger vehicle drivers as the factory-based height and tilt-adjustable safety handle on professional hand trucks do for material handling professionals. In addition to safety aspects, CLICK4 also provides the conditions for flexible, controlled handling in an ergonomic posture. This ideal functionality for height adjustments is finally also available on hand truck handles.

Whatever your favorite grip position may be, the CLICK4 handles can be adjusted to your specific needs.

CLICK4 – the functionality for height adjustability is finally also available on hand truck handles.

CLOSED DOG-EAR HANDLES WITH HAND GUARDS

Ergonomically shaped dog-ear handles made from hand-friendly EXLAN plastics with integrated hand guards – they promote a consistently upright body posture, easy travel within the center of gravity, relieve the hand muscles, and prevent injuries.

CLOSED DOG-EAR HANDLES

Closed dog-ear handles are primarily used on classic folding hand trucks. These give the user a wide range of individual gripping options for travel at the center of gravity and relieve the hand muscles.

SAFETY HANDLES

Safety handles protect the hands during travel through tights aisles and when maneuvering between vehicles. The handles permanently and securely engage into the handle tube without using glues or distracting screws.

HANDLES WITH HAND PROFILES

Handles with hand profiles in the unique hammer handle shape with expanded elliptical tube ends for a secure grip during travel. The handles permanently and securely engage into the handle tube without using glues or distracting screws. This handle version is ideal for warehouse hand trucks.

BOW-SHAPED HANDLE

The space-saving and hand-friendly bow handle made from EXLAN plastics or with slip-proof rubber coating provides an enormous variety of ergonomic grip positions. It is primarily used for package and service cart applications.

MAKING SURE THAT EVERYTHING RUNS SMOOTHLY FOR YOU – OUR QUALITY WHEELS

We have the ideal quality wheel for any floor condition and any application. Select among various wheel with the same diameter – these are generally interchangeable! The last two digits in the hand truck type number generally indicate the wheel number. The carcass design on pneumatic wheels ensures the maximum load capacity at the minimum rolling resistance. All wheels are odor-neutral, and are each equipped with two water and dust-proof grooved ball bearings.

DECADES OF PERFORMANCE

The No. 21 pneumatic wheel with radial tread has been enthusiastically received by customers worldwide since the 60s. It has an unequaled high-quality carcass design that ensures maximised load capacity.
The AIRLEX wheel No. 25 began its history of success as the „puncture proof“ wheel in 1998. This radial tread wheel has materially contributed toward efficiency primarily in the beverage industry. Due to its material composition – it consists of polyurethane and contains thousands of micro-cellular air bubbles – its service life is extended by a factor of five! Both wheel types offer minimised rolling resistance, very good shock absorption on uneven floors, and track incredibly true.

NOW YOU CAN DECIDE.

What wheel do you prefer on your customised EXPRESSO hand truck. You can see our wheel versions on the right. And we are more than happy to advise you!

No. 21 – the pneumatic wheel: For decades, the epitome for comfortable, professional material handling

No. 25 – the proven "unflattable" wheel preferred by the beverage industry since 1998: the AIRLEX wheel

EXLAN WHEEL RIM

One-piece design with two water and dust-proof grooved ball bearings, tool-free assembly; the wheels are positioned on the rim and secured with the locking ring.

NO. 21 – Ø 260 mm

Pneumatic wheel with radial tread, minimised rolling resistance, including on uneven floors very good shock absorption

NO. 22 – Ø 260 mm

Pneumatic wheel with lug tread, low rolling resistance, including on uneven floors very good shock absorption

NO. 23 – Ø 260 mm

Pneumatic wheel with radial tread, light grey, non-marking minimum rolling resistance even on highly sensitive floors, very good shock absorption

NO. 24 – Ø 260 mm

Heavy-duty pneumatic wheel with radial tread, reinforced, minimum rolling resistance, very good shock absorption, including on uneven floors

NO. 25 – Ø 260 mm

AIRLEX, no flat wheel risk, foamed polyurethane, light grey, non-marking, radial tread, very good shock absorption, low rolling resistance, incredible service life

NO. 01 – Ø 260 mm

Pneumatic wheel with rib tread, low rolling resistance, very good shock absorption, including on uneven floors

NO. 62 – Ø 260 mm

Airelastic flat tread, two-component wheel with high elasticity, good shock absorption, low noise, smooth running, light grey, non-marking

NO. 66 – Ø 260 mm

Smooth-running flat tread wheel with high elasticity, low noise running, very low rolling resistance

NO. 42 – Ø 200 mm

Airelastic flat tread, two-component wheel, with high elasticity, low noise, smooth tracking, good shock absorption, light grey, non-marking, no marks on sensitive floors

NO. 45 – Ø 200 mm

Airelastic flat tread, non-marking and unflattable, made from premium polyurethane, good elasticity and very good shock absorption, wide rolling surface, low-noise running, maintenance-free

NO. 76 – Ø 200 mm

Smooth-running flat tread high elasticity, low noise running, very low rolling resistance

NO. 71 – Ø 175 mm

Airelastic flat tread, light grey, two-component wheel with high elasticity, low noise, smooth running, good shock absorption, non-marking on sensitive floors

NO. 05 – Ø 160 mm

Smooth-running flat tread, good elasticity, low noise running, low rolling resistance

TUBULAR SHOVELS FOR CARTONS, CRATES, BASKETS

EXPRESSO tubular shovels are used on mail & parcel distribution hand trucks in a wide range of industries, such as KEP service providers, in the food and deep-freeze sector. Cartons, crates, and baskets are ideally transported with folding tubular shovels in various lengths and widths. Particularly wide configurations are used to move very bulky cartons. The supporting feet protect sensitive materials against damage, moisture, and dirt, and the optimised tilt angle protects materials in the parked position.

FOLDING TUBULAR SHOVEL WITH WIDENED LOAD AREA AND SUPPORTING FEET

PROFILED, PRECISION-MILLED FOOTPLATES

The ideal premium footplate for any application – select your favorite. The tightly profiled, precision-milled spade footplate made from special alloys secures the material against sliding laterally. It has a slight front bevel, therefore simplifying traveling under the load. The concave footplate rear wall provides good support for cylindrical materials such as drums and rollers. On request, we can also supply all spade footplates in folding configurations - at no extra charge!

QUALITY DUE TO UNIQUE DESIGN AND PRECISION WORKMANSHIP

FAVORITES

HAND TRUCKS WITH CLICK4

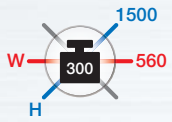

Whether you are tall or short, any user can move loads with the correct posture by using the height-adjustable CLICK4 handle design.

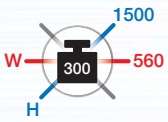

In addition to safety aspects, the CLICK4 handle also provides the conditions for flexible, controlled handling in an ergonomic posture.

Type 285 811 21

Type 285 815 25

INFO-BOX

Hand trucks with the patented CLICK4 handle design come standard with a 1400 mm rail height. However, you can also order these in any desired custom height!

Type 285 815 25 hand truck: This transporter is equipped with the patented CLICK4, the proven No. 5 footplate and unflattable AIRLEX wheels.

Using the four snap locks, the Quick-CLICK locking system is adjusted in the same manner as a bicycle seat (see page 16).

HAND TRUCKS WITH DOG-EAR HANDLES

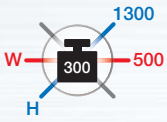

Supporting skids permit kerbs and small steps to be traversed easily, which also helps to protect sensitive loading goods.

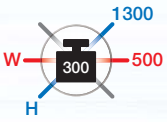

The rounded, fiberglass reinforced cross members significantly enhance the strength of the hand trucks; the upper member is used as the handle. (Self-service trolleys, see page 67)

Type 243 811 21

Type 243 815 25

INFO-BOX

The unflattable No. 25 AIRLEX wheel is made from foamed polyurethane. It provides long service life and very comfortable travel.

Our Type 243 811 21, the favorite among hand trucks. The combination of dog-ear handle, angled skids and No. 21 pneumatic wheels make it so successful.

25 years of proven performance: The hand guards on the ergonomic dog-ear handle made from EXLAN plastics protect the hands against injuries.

HAND TRUCKS WITH SAFETY HANDLES

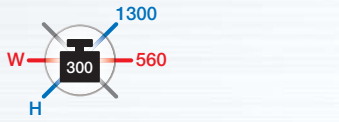

Several hundred thousand copies of this proven allrounder have been sold: this hand truck is worldwide proof that professional material handling is more economical and efficient.

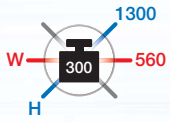

In addition to low rolling resistance, the No. 21 and No. 23 (grey) pneumatic quality wheels with radial tread also provide two water and dust-proof grooved ball bearings.

Type 2 011 21

Type 2 015 25

INFO-BOX

All EXPRESSO hand trucks can be fitted with an advertising panel. Please send us your company logo or text.

An additional safety feature: the safety handles protect the hands against injuries and relieve the hand muscle when moving heavy loads.

The anti-slip treads of the angled skids have an integrated red wear indicator to protect the structure. The clamp systems allows these to be replaced within seconds.

STACKING HAND TRUCKS

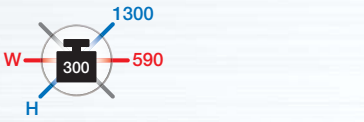

The hand trucks are available in heights of up to 2,000 mm and custom dimensions. They are ideally suited for material handling tasks in warehouses without stair connections.

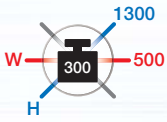

The warehouse hand trucks are characterized by their curved tube handle design. This allows carts with heavy loads to be easily tilted and moved.

Type 2 031 21

Type 5 204 66

INFO-BOX

Type 5 204 66:
The special cavity on this footplate is designed for special purpose transportation of cylindrical materials, such as rolls of carpeting. It prevents the sensitive, heavy goods from sliding off.

The curved shape of the axle simplifies tilting even heavy loads and prevents the foot from slipping.

The No. 66 smooth running flat tread wheel with water and dust-proof grooved ball bearings provides a comfortable ride primarily for trucks starting at heights of 1,500 mm.

PARTICULARLY SPACE-SAVING IN PASSENGER CARS AND VANS

FOLDING & VEHICLE HAND TRUCKS

FOLDING HAND TRUCKS

Safety – The folding mechanism on folding EXPRESSO hand trucks is specially secured by hand-friendly EXLAN sliding sleeves.

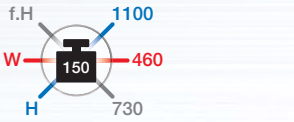

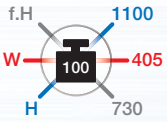

For improved efficiency: the widened load area widener attached on the upright increases the load capacity several-fold (see page 108).

INFO-BOX

The closed dog-ear handle permits different grip positions, therefore always facilitating an upright body posture when moving loads at the center of gravity.

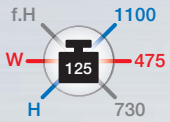

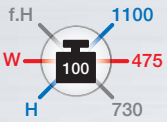

Flexible – Hand trucks can also be equipped with center struts. The upper section of these are made with flexible rubber band.

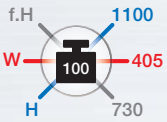

The folding footplate and the folding upright permit EXPRESSO equipment to be stored in passenger cars and vans in a very space-saving manner.

FOLDING HAND TRUCKS

The supporting feet on the tubular shovels protect your load against damage, moisture, and dirt.

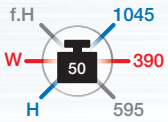

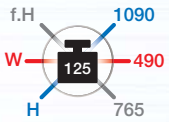

Facilitates a professional presentation, for instance by sales reps: the lightweight, handy and practical aluminium folding hand truck– uniquely EXPRESSO!

INFO-BOX

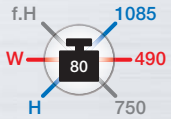

The aluminium structure of the Piccolino family gives users high load capacity (50, 80, 125 kg) at low dead weight.

Type 0 226 00

Piccolino, the compact material handling miracle for leisure, hobby, and shopping – only two steps are required to give you a rugged transporter!

Unmatched – The appealing design and easy storage make the Piccolinos into an unrivaled transporter in the 'handbag" format.

VEHICLE HAND TRUCK

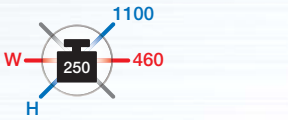

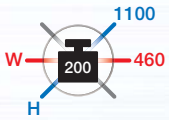

The wheel guard made from EXLAN plastics protects sensitive loads against damage and dirt.

The center strut prevent small packages from sliding through. These can be easily retrofitted on many EXPRESSO hand trucks (see accessories on page 104).

INFO-BOX

Reliable service is becoming increasingly important. EXPRESSO equipment simply helps you to transport even more professionally and faster! On request, all vehicle hand trucks are also available as folding designs!

The curved shape of the axle simplifies tilting even heavy loads and prevents the foot from slipping.

The small supporting skids help to overcome obstructions, such as curbs and steps. This is advantageous in terms of safety when delivering in cities.

CUSTOMER-ORIENTED SERVICE BASED ON EXPRESSO QUALITY

MAIL AND PARCEL HAND TRUCKS

MAIL AND PARCEL HAND TRUCKS

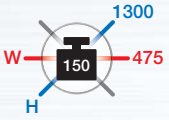

Unbeatable: Type 823 280 1155 with 3-wheeled mechanism for controlled climbing of steps, including cross members with integrated anti-slip stripe.

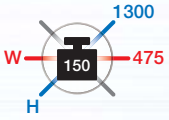

The additional center strut on hand trucks prevent small packages from sliding through. This is not only practical, but also safe.

Type 823 271 42

Type 823 271 42G

INFO-BOX

The large folding tubular shovels on parcel hand trucks securely hold cartons in place, allowing bulky goods to be delivered safely, fast, and conveniently.

The small supporting skids help to overcome obstructions, such as curbs and steps. This is advantageous in terms of safety when delivering in cities.

All hand trucks are also available with straight cross members. Packages, crates, and cartons therefore have even better support on the upright, for safe transportation.

MAIL AND PARCEL HAND TRUCKS

From the extensive footplate product range: The No. 8 (400 x 350 mm) footplate can be used to transport large as well as many small cartons.

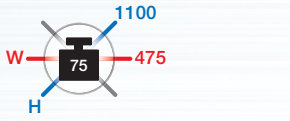

Safety handles protect the hands while traveling through tight aisles, and provide a particularly safe grip while transporting heavy loads.

INFO-BOX

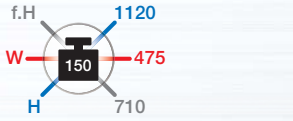

The delivery bags, Type 01012 made from durable plastic weave, simplify distributing flyers and newspapers (see page 114).

Type 821 274 45

Type 851 276 4502

Distributing flyers and newspapers must be accomplished smoothly and quickly. A rugged, high-quality companion is an important help in this case.

Handling equipment from professionals for professionals: Lightweight, collapsible hand trucks with customised accessories (p.104) are indispensable companions for service employees.

PARCEL AND SERVICE HAND TRUCKS

The Type 1312 upright extension and the Type 1340 extra-wide tubular shovel increase the load capacity several-fold – this particularly characterizes this cart.

International KEP companies rely on proven EXPRESSO quality – made in Germany to provide customer oriented service.

INFO-BOX

The upper, fiberglass-reinforced cross member is used as the handle, e.g. for safely transporting loads over stairs. The curved shape protects hands against injuries from the load.

The supporting feet on the folding tubular shovels protect your sensitive loads against damage, moisture, and dirt.

The bow handle with hand-friendly, slip-proof plastic coating allows a wide range of different ergonomic grip positions.

PROFESSIONAL LOGISTICS SURROUNDING THE BEVERAGE TOPIC

BEVERAGE HAND TRUCKS

BEVERAGE HAND TRUCKS

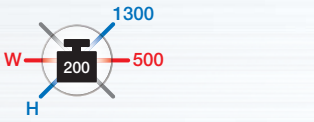

Sensitive goods need to be transported in a particularly safe manner: the Type 2 212 21 hand truck does so even in confined sales environments.

The height-adjustable retainer is used to lift different beverage crates. The pivot is used by folding back the No. 2 footplate.

Type 243 212 21

Type 285 212 21

INFO-BOX

We recommend: the unflattable No. 25 AIRLEX wheel made from foam polyurethane has a long service life, and provides a comfortable ride.

In addition to very low rolling resistance, the No. 21 pneumatic quality wheel with radial tread provides two water and dust-proof grooved ball bearings.

The ergonomic dog-ear handles with hand guards have for decades shaped the appearance of professional beverage hand trucks for industry, trade, and restaurants.

BEVERAGE & DUAL STACK HAND TRUCKS

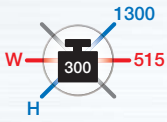

We recommend the Type 1046 hook to safely transport KEG drums. It is available as an accessories and can be found on page 110.

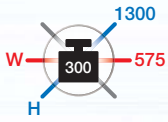

The height-adjustable hook permits KEG drums of various sizes to be transported, therefore simplifying the logistics of these cylindrical goods.

Type 8 018 24

Type 843 818 24+1220

INFO-BOX

The Type 1220 folding side retainer bracket secures the dual stack while transporting and maneuvering. It is adjustable in three settings, therefore allowing various crate types to be handled.

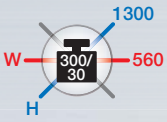

Industry-specific detail: the special purpose footplate with beveled corners is ideal for loading and unloading the hand truck with dual beverage stacks.

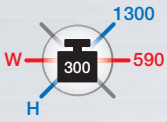

The angled skids with integrated wear indicatores facilitate safe and easy transportation of crates and bins over stairs and steps.

BEVERAGE HAND TRUCKS

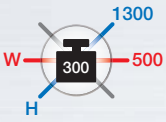

Type 2 015 25+1228

Type 2 036 21+119702

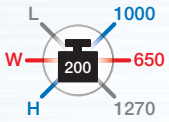

Type 243 8110 25+1222+1052

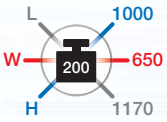

Water bottles are efficiently transported with the individually folding lifting devices. A mixed load with beverage cases is also possible.

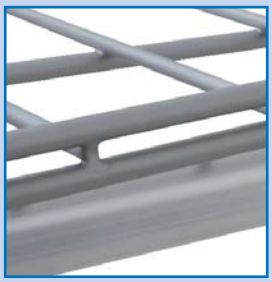

The Type 1222 (retainer bracket) and Type 1052 (folding safety bracket) accessories ensure an ideal hold for stacked KEG drums (see page 110)

INFO-BOX

Due to the high-gloss appearance of the tight-mesh load surface, the self-service trolley is an ideal match for well-maintained retail space.

Self service trolleys in two sizes for two or three cases in row. Automatic parking brakes allow safe loading and unloading on sloping parking lots.

All self-service trolleys can be equipped with coin lock units (Type 087, incl. latch chain, see page 109) to maintain order in parking lots and at the beverage and supermarkets!

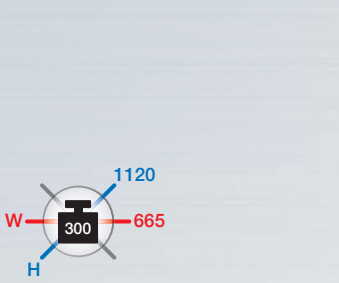

FOR HANDLING A VARIETY OF GOODS

MULTIFUNCTION HAND TRUCKS

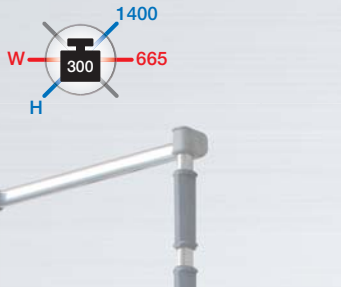

MULTIFUNCTION HAND TRUCKS

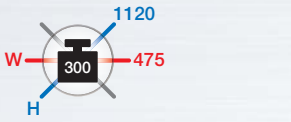

Type 631 636 21

Type 634 636 21

Type 631 645 76

The many different protective profiles on multifunction hand trucks protect high-value and unpackaged goods against damage; also available as an accessory (see page 113).

Special multifunction hand trucks simplify handling of heavy and bulky goods, such as washers, dishwashers, or refrigerators.

INFO-BOX

Transporting a variety of goods safely: the transport allrounders are capable of doing this due to the two footplates. A short, flat footplate for heavy goods up to 300 kg, and a tubular shovel for boxes and packages up to 150 kg – a clever idea!

We can also supply our ClipFix lashing strap to secure heavy, bulky goods. The belt is simply clipped into the upright, and is available in various lengths (see page 112).

We recommend the Type 1178 carrying frame accessory to conveniently move bulky and heavy loads across stairs with two persons (see page 114).

TRANSPORT-ALLROUNDERS

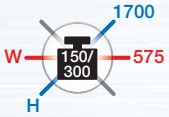

Transporting a wide range of goods safely – from large cartons too bulky appliances, the multifunction hand trucks ensure convenient distribution.

Type 823 820 21 160KL with top-folding upright for convenient tilting. The load capacity of 300 kg only applies when using the rigid footplate and the bottom handles.

INFO-BOX

To protect sensitive and unpackaged goods against damage during transport, we recommend the soft protectors, which are simply attached on the upright with Velcro straps (see page 113).

Type 1178 carrying frame accessory: it is used to ergonomically and simply move heavy and bulky goods across stairs with two persons (see page 114).

A clever accessory: the Type 1213 retractable auxiliary wheels (see page 116) to easily move large, bulky goods, for instance in warehouse buildings.

DUAL-PURPOSE HAND TRUCK

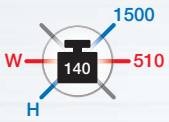

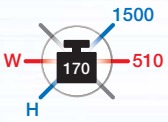

One hand truck – two functions: this multifunction hand truck can be used as a classic hand truck, but also as a maneuverable four-wheeled cart with two swivel casters.

The foot pedal converts the aluminium hand truck into a versatile four-wheeled cart for bulky loads – this is how material handling is accomplished today!

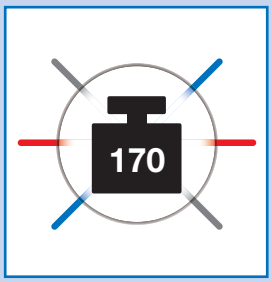

INFO-BOX

The reinforced design of the stair climber (Type 8 071 96) has even greater capacity, and can now easily and safely transport up to 170 kg. Also new: the configuration with pneumatic wheels.

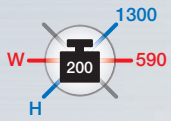

The electrical stair climber saves time, reduces costs, and prevents injuries, since one person can use it to transport heavy goods over stairs.

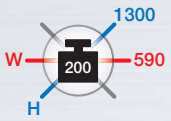

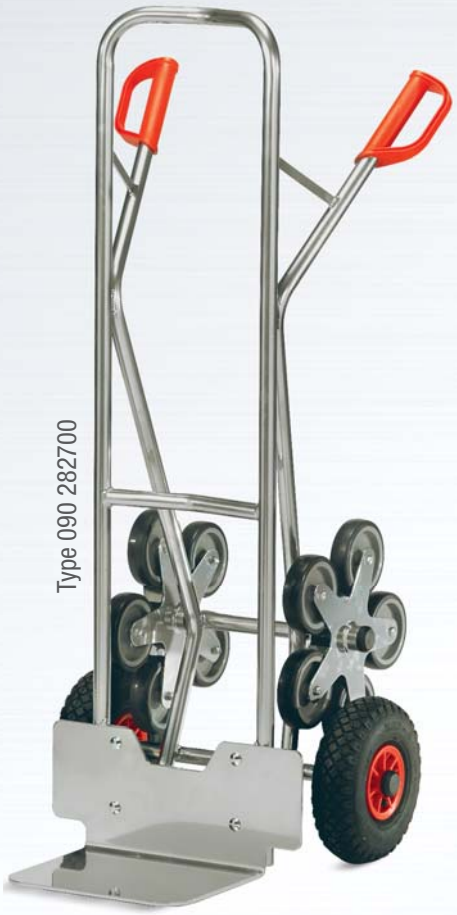

Up and down stairs: this electrical climbing system has been proven for more than 20 years and uses safety brakes that always automatically stop at the stair ledge.

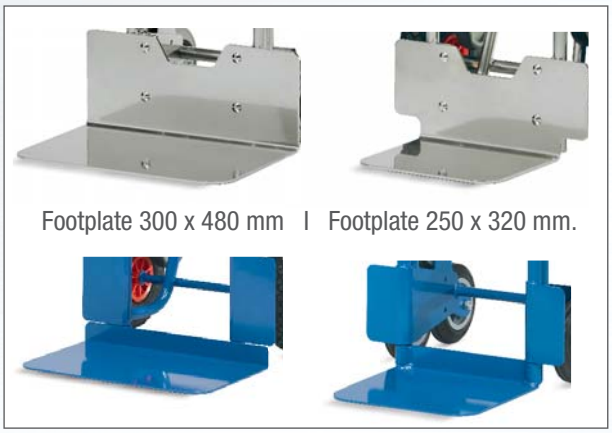

ALUMINIUM STAIR HAND TRUCKS

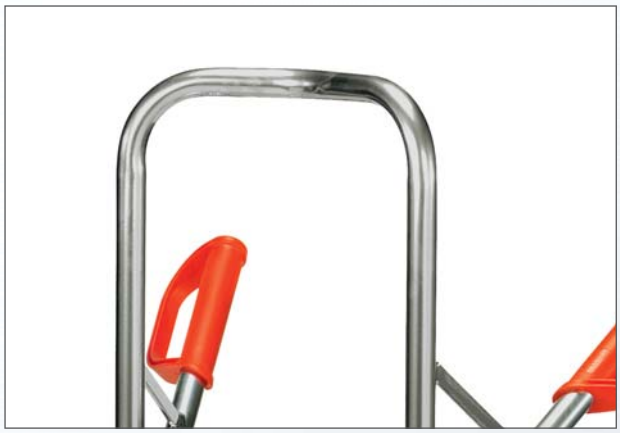

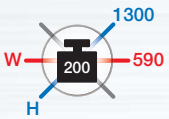

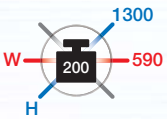

Stair hand truck configuration with safety handles, optionally in aluminium or steel, with three or five-wheeled star mechanism and a 300 x 480 mm or footplate 250 x 320 mm.

The round upright and cross member are curved, which facilitates safe transportation of cylindrical goods, such as rolls, cans, buckets, etc.

Type 090 1325 TK16

Type 090 1328 TK20

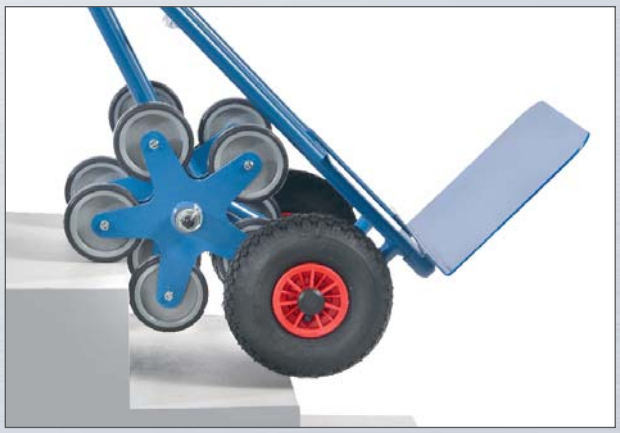

INFO-BOX

Optionally available: the Type 0901770 star-shaped wheel lock as attachment kit for stair hand trucks with three-wheeled star. It is used for trouble-free travel on two wheels on level surfaces.

Aluminium and steel stair hand trucks with two three-pronged wheel stars with solid rubber wheels for travel on good floor conditions in level areas with frequent stair travel.

The stair hand truck with two pneumatic wheels and five-pronged wheel star provides advantages when moving on floor conditions in level areas with occasional stair travel.

FOR USE IN OFFICE AND RESTAURANT APPLICATIONS

CHAIR AND BAGGAGE TRANSPORT

CHAIR TRANSPORT TRUCKS

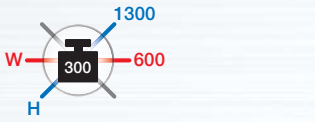

The mobile, clamp-on chair accessory - Type 1144 - provides simple, assembly-free handling. Without the chair attachment, the hand truck is an ideal allrounder.

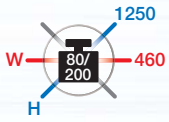

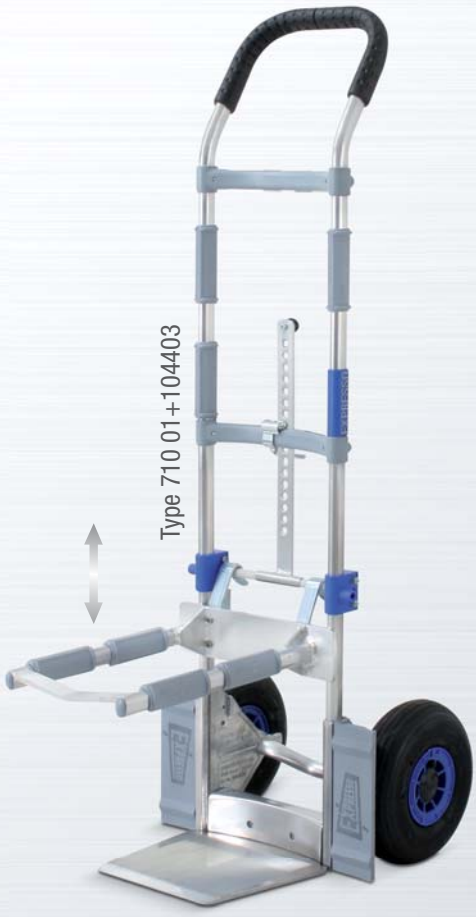

The Type 1044 height-adjustable chair attachment is suitable for transporting different types of chairs. It is folded up and engaged when not in use.

Type 243 8110 23+1029+1196

Type 710 01+104403

INFO-BOX

Other clever industry-specific accessories for hotels and symposium venues, such as devices for transporting tables are shown on page 107.

Simple device for moving stacked chairs: the transport rail is engaged on the footplate back wall and is therefore easy to attach.

The round upright has a hand-friendly, slip-proof plastic coating. It provides a secure grip when moving the cart with heavy chairs.

BAGGAGE TRUCKS

Perfect service is the key: the baggage hand trucks are easy to use and versatile. Center struts prevent small packages from sliding through.

Supporting skids simplify climbing curbs and minor steps, therefore protecting your guests' sensitive travel baggage.

INFO-BOX

Reliable service is becoming increasingly important. EXPRESSO's transport equipment helps you to work more efficiently and professionally.

The supporting feet on the folding tubular shovels protect your sensitive loads against damage, moisture, and dirt.

The Type 201 277 45 baggage hand truck is small and maneuverable, and therefore requires very little storage space in the foyer or the reception area.

SPECIAL DEVICES WITH INDUSTRY-SPECIFIC DETAILS

DEEP-FREEZE AND CONVENIENCE

DEEP-FREEZE AND CONVENIENCE TRUCKS

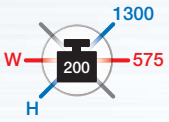

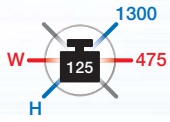

The retaining strap and the supporting skids allow the deep-freeze truck to be conveniently and safely pulled up or set down via the steps on the refrigerated truck.

The special supporting feet on the precision footplate prevent dirt and damage on sensitive goods, and protect against moisture.

Type 823 280 2103

Type 823 280 4203

INFO-BOX

Industry-specific detail: all important plastic components on deep freeze trucks are freeze-resistant up to -40° C. This has benefits even under extreme conditions.

Die Tiko- und Convenience-KarreType 823 280 2103 ist auch als Sonder-Ausführung mit AIRLEX-Rädern und kleinen Kunststoffkufen lieferbar.

Greater safety for delivery tasks: The supporting skids help to overcome obstructions, such as curbs, steps, and the small stairs.

DEEP-FREEZE AND CONVENIENCE TRUCKS

Easy and fast: the included Type 1421 pallet fork (see page 111) with a load capacity of 150 kg is simply inserted and immediately available for use.

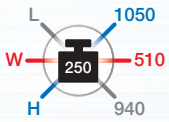

Using the pallet fork, ¼ pallets can be easily moved with a hand truck and effortlessly set down on a euro-pallet.

DISPLAY PALLET HOIST

Type 04 671 (rearview)

Type 04 671

INFO-BOX

The pallet hoist consists of drawn aluminium profiles and is equipped with a stainless steel push bar, precision ball bearing bushings, and highstrength wheels (available with brakes).

Hydraulic hoisting and lowering function to lift, handle, and transport quarter pallets, and for moving loads at floor level with a maximum payload of 250 kg.

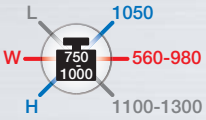

The tested, reliable hydraulic cylinder is controlled by a dual function foot pedal for lifting and lowering. Custom configurations on request.

MULTI-PURPOSE/ PALLET JACKS

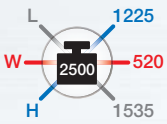

Type 0 673 01 - 0 673 04

Type 0 674

Further models on enquiry

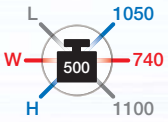

Using the multi- purpose lift truck, e.g cabinets can be lifted directly from the floor. It can be used for a wide range of tasks due to the laterally adjustable forks (400 – 825 mm).

Ready to tackle the toughest jobs up to 2,500 kg: The pallet truck is an indispensable tool to quickly stage and position pallets.

Type 04 675 (rearview)

Type 04 675

INFO-BOX

We recommend the combination pallet lifter with adjustable forks for transporting ¼ and ½ pallets, and for picking orders from rolling containers.

Combination pallet lifter with adjustable forks: Ideal for transporting ¼ and ½ pallets, and to stage containers from rolling containers.

The lifting and lowering function is controlled by the foot pedal. The lift truck is maneuverable and therefore ideally used in commercial and warehouse buildings.

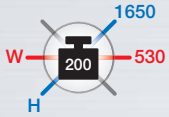

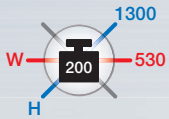

TRANSPORTING UP TO EIGHT FULLY ASSEMBLED WHEELS ERGONOMICALLY

TYRE TRUCKS

TYRE TRUCKS

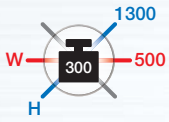

Type 546 810 2501 is equipped with auxiliary swivel casters, allowing tyre stacks to be ergonomically moved over long distances with even greater ease.

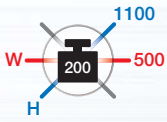

Directly from the car to the tyre truck – the angled skids with EXLAN plastic profiles allow tyres to be handled without risking your employees' health.

Type 243 814 21

Type 211 824 21

INFO-BOX

Say goodbye to back-breaking tyre rolling – the aluminium tyre truck can be used to easily and quickly transport up to eight tyres or fully assembled wheels. And all of this is accomplished without effort, since the stack is ideally located at the center of gravity while moving.

Due to the large No. 4 footplate, tyres and other valuable goods, such as aluminium rims can be safely transported.

The ergonomic dog-ear handles give truck users a wide variety of gripping positions. This promotes and supports back healthy working practices.

HANDLING DRUMS WITH DIFFERENT DIAMETERS

DRUM-HANDLING TRUCKS

DRUM-HANDLING TRUCKS

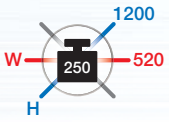

Drum handling made easy: large, heavy drums up to 500 kg can be moved with even greater ease and more conveniently with supporting wheels (see page 116).

The unique triangular plates facilitate flexible uses since they permit the safe transport of a wide range of drum diameters.

Type 823 138 24

INFO-BOX

This EXPRESSO special purpose equipment is ideal for paint drums with airless, ready to apply paint for spraying or rolling. The hand truck is used to conveniently and quickly transport containers to the worksite. The angled skids create the ideal position to apply paint.

Type 117302 tilting aid for hand trucks – this innovative equipment accessories simplifies the fatiguing and exhausting tilt procedure by 30% (see page 111).

Special applications call for special transportation aids: the special bracket for drums, the tilting aid, and the No. 24 heavy-duty wheel make a compelling case for professional users.

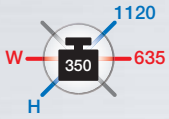

HOT-DIP GALVANISED STEEL PROVIDES CORROSION PROTECTION WITHOUT MAINTENANCE

STEEL HAND TRUCKS

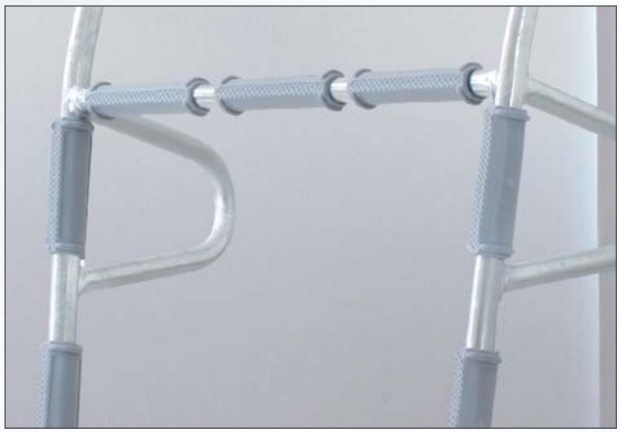

STEEL HAND TRUCKS

Type 6 726 21 (steel, hot-dip galvanised)

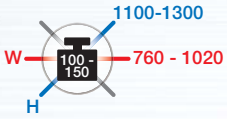

The many different protective profiles on the multi-purpose hand trucks protect high-value and unpackaged goods against damage; also available as an accessory (see page 113).

Frequently, it simply has to be steel: hot-dip galvanizing provides decades of corrosion protection without maintenance effort.

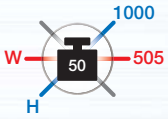

STEEL HAND TRUCKS FOR STEEL CYLINDERS

Type 090 51006 - 090 51042

Type 090 51005

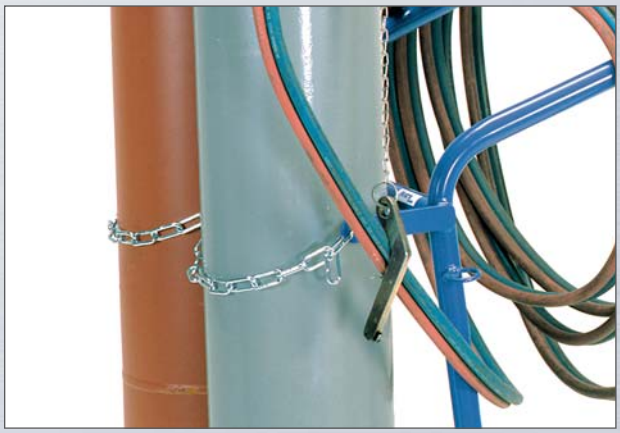

INFO-BOX

Optionally available:
the lockable toolbox,
Type 090 51060
Dimensions L x W x H:
450 x 200 x 150 mm

The figure shows the Type 090 51021 steel cylinder hand truck with additional supporting swivel caster, which facilitates convenient maneuvering of heavy goods.

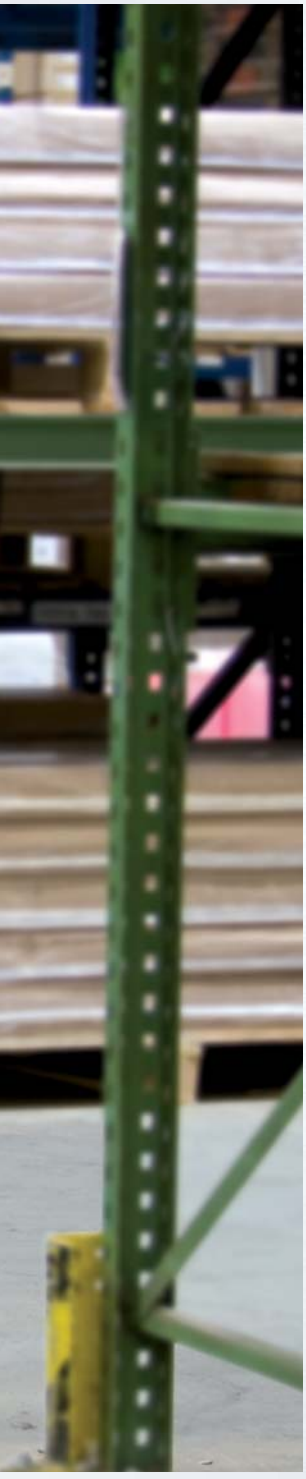

An appropriate type for any cylinder size and application: The securable safety chains and three-sided perimeter on the footplates provide an extra safety margin

YOUR HAND TRUCK AS A CUSTOMISED SPECIAL-PURPOSE TRANSPORTER

Clever accessories – task-oriented and designed to meet your needs! The aluminium modular system makes it possible: The extensive product range of hand trucks is also reflected in the high variety of EXPRESSO attachments – we call these accessories. They are precisely tailored to your industry or your application and simplify and optimise moving your specific goods.

Our best-selling EXPRESSO applications, such as upright extensions, footplate extensions, drum hooks, water bottle or chair attachments convert your hand truck into a customised special-purpose transporter. And if you have highly specialized needs, we will gladly advise you with detailed and professional information based on our decades of experience. We look forward to your call, your fax or e-mail.

ADVERTISING AND INSCRIPTION PANEL

All EXPRESSO hand trucks can be fitted with an advertising panel. All your existing hand trucks can be retrofitted with advertising panels. This protects your property, promotes your company name, and enhances your professional image. Please send us your company logo or text.

Type 108008 for hand trucks with 440 mm axle width
Type 108204 for hand trucks with 510 mm axle width
Type 1083 for hand trucks with 530 mm axle width

CENTER STRUT

prevents small packages from sliding through

Type 1190* for hand trucks with safety handles
Type 1191* for folding hand trucks. Model 2 851 ...
Type 1194* for folding hand trucks
Type 1196* for hand trucks with dog-ear handles and CLICK4 handle design

(*Model No. + G for hand trucks with straight cross members)

UPRIGHT EXTENSION

extends up to 400 mm for transporting particularly tall loads, for hand trucks with 405 mm and 440 mm axle widths. The load capacity for the extended, deployed upright section is reduced to 30 kg.
The upper cross member cannot be used as a handle!

Type 1093 for folding hand trucks
Type 1193 for hand trucks

CHAIR LOADING FRAME 1

Height-adjustable (hole rod) load frame for moving stacked chairs of varying designs (max. 10 pieces)

Type 1044 for hand trucks with 440 mm axle width

Type 104403 for hand truck Type 710 01 (see page 81)

CHAIR LOADING FRAME 2

mobile; easily clamped to the upright chair attachment for transporting different chair models (max. 10 pieces)

Type 1144 for hand trucks with 440 mm axle width

Type 114401 for hand trucks with 507 mm axle width

CHAIR LOADING ATTACHMENT

Transport rail, engages into the footplate rear panel to move stacked chairs (max. 10 pieces)

Type 1029 for hand trucks with 440 mm axle width

TABLE LOADING FRAME

Used to conveniently move tables
Note: Must be used in combination with Model 1044 chair attachment

Type 1050 for hand trucks with 440 mm axle width

LOAD AREA WIDENER WITH SIDE FRAMES

Increased load volume for efficient transportation – the foldable side frames also prevent bulky goods from sliding laterally (W x H: 500 x 1150 mm)

Type 1311 for all hand trucks starting at a height of 1300 mm

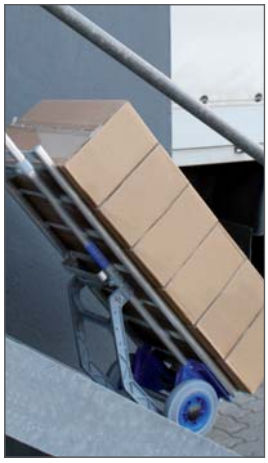

LOAD AREA WIDENER 1

Facilitates transporting wide, bulky goods and increases the load capacity

Type 1312 (W x H: 500 x 750 mm) for hand trucks with a height of 1100 mm

Type 131001 (W x H: 440 x 1100 mm) for hand truck Type 5 230 42

LOAD AREA WIDENER 2

to widen load areas and to safely transport very wide goods (W x H: 480 x 1000 mm)

Type 119702 for all hand trucks starting at a height of 1300 mm

WATER BOTTLE CARRIER

for efficient and convenient transport of up to five water bottles – the individually foldable carrying attachments (load capacity 30 kg each) also permit mixed loads.

Type 1228 for all hand trucks with angled skids and starting at a height of 1300 mm

SIDE RETAINER BRACKET

Adjustable in three width settings (inside dimension) 410 mm, 550 mm, and 610 mm, for safely transporting bulky, voluminous goods (e.g. dual stacks); ideal for service hand trucks with varying loads

Type 1220 (length: 150 mm, left image) for all hand trucks

Type 1455 (length: 440 mm, right image) for hand trucks with 530 mm axle width

SPACER FOR DUAL STACK

keeps dual stacks of boxes and crates in the ideal position

Type 1023 for hand trucks with 440 mm axle width

Type 1225 for hand trucks with 510 mm axle width

FOLDABLE SAFETY BRACKET

to safely transport beverage crates on sloping parking lots and ramps

Type 1088 for self-service trolleys

COIN LOCK UNIT AND LATCH CHAIN

maintains order in your parking lot or retail spaces

Type 087 Coin lock for self-service trolleys and baggage carts

Type 901908006 latch chain (1000 mm)

HAND TRUCK ACCESSORIES

FOLDABLE RETAINER BRACKET FOR DRUMS

are mounted to the upright and provide secure lateral support for KEG drums. The retainers can be folded between the uprights, allowing the truck to be used in its standard configuration.

Type 1222 for hand trucks with 440 mm axle width

FOLDABLE SAFETY CATCH

installed between the uprights. The safety catch is folded down and secures up to two KEG drums from above.

Type 1052 for hand trucks with 440 mm axle width

RETAINER FOR ROLLS AND STEEL CYLINDERS

for transporting different cylindrical goods, installed between the uprights, adjustable diameter, optionally with safety chain for hand trucks with 440 mm axle width

Type 1037 retainer without chain

Type 1037KETTE Retainer with chain has an additional load retainer

KEG DRUM HOOK

to secure KEG drums, height adjustable with hole rod

Type 1046 for all hand trucks

¼ PALLET FORK

for easy and ergonomic transportation of ¼ pallets. The integrated hook allows it to be easily inserted into the lower cross member, and to be carried on the aluminium hand truck at all times.

Type 1421 for hand trucks with 440 mm axle width

SMALL PALLET

L x W: 335 x 485 mm, wooden, simplifies and speeds up the loading process when the load is stacked on the pallet; the load is then not in direct contact, e.g. with dirty floors.

Type 0 13 18 for all hand trucks

UNLOADING MECHANISM

to easily and safely push off cartons, packages, and crates from the spade footplate

Type 1230 for hand trucks with 440 mm axle width

FOLDABLE TILTING AID (PEDAL)

simplifies the strenuous tilting process by 30%

Type 117301 for hand trucks with 440 mm axle width

Type 117302 for hand trucks with 510 mm axle width

HAND TRUCK ACCESSORIES

CLIPFIX LASHING STRAP

to secure bulky goods on hand trucks,
for clamping onto the upright

Type 0 155 1500 (strap length: 1500 mm)
Type 0 155 2500 (strap length: 2500 mm)
Type 0 155 3500 (strap length: 3500 mm)

LASHING STRAP

with ratchet lock to attach and
secure loads to hand trucks

Type 0 155 250 (strap length: 2500 mm)
Type 0 155 350 (strap length: 3500 mm)

HEAVY-DUTY LASHING STRAP

two-piece, with ratchet lock to attach
and secure loads to hand trucks

Type 0 156 3700 (overall strap length: 3700 mm)

TILTING AID AND RETAINER CLIP

adjustable, hooks into the cross member, prevents the load from moving when tilting the hand truck, keeps the load on the upright, for safe transportation of e.g. appliances

Type 1179 for all multi-purpose hand trucks with dog-ear handles with hand guards
(see page 70)

PROTECTIVE PROFILES

are used to protect loads and to secure sensitive goods such as appliances against sliding laterally

Type 304 3 033 for all hand trucks with elliptical tube uprights

SOFT PROTECTORS

are attached to the upright with Velcro strips and protect highly sensitive and unpackaged goods against damage.

Type 301 3 037 (length: 70 mm)
Type 301 3 038 (length: 140 mm)

SAFETY REFLECTOR

made from highly reflective 3M Scotchlite material; taped to protective profiles and activated by light (e.g. automobile headlights) in low light conditions – this provides an extra safety margin.

Type 301 3 034 for all hand trucks with elliptical tube uprights

DRUM BRAKE

ensures consistently good braking performance in any weather and terrain. The brakes are actuated on both wheels with bowden cables

Type 1169 for all hand trucks with wheel diameter Ø 260 mm

HAND TRUCK ACCESSORIES

CARRYING FRAME

Carrying frame, to easily transport heavy goods over stairs with two persons – the different model numbers respectively refer to the axle widths of the hand truck model.

Type 1172 for 440 mm axle width
Type 1176 for 600 mm axle width
Type 1178 for 510 mm axle width

STOWING HANGER, ALUMINIUM

with automatic safety latch – ideal for vans, warehouses, and garages

Type 1166

WIRE BASKET

Inside dimensions: 465 x 265 mm (W x H) weather-resistant, bright galvanised steel – ideal for plastic crates

Type 090 for mail and package trolley
Type 851 276 4502 (see page 57)

MAIL / BROCHURE DELIVERY BAG

Outside dimensions: 240 x 420 x 300 mm (L x W x H) made from durable plastic weave for delivering letters, advertising, and brochure materials

Type 01012 for mail and package trolley
Type 821 274 45 (see page 57)

WHEEL STAR LOCK

as attachment kit for stair hand trucks with three-wheeled star. The lock is used for convenient travel on two wheels on level surfaces.

Type 0901770 for stair hand trucks with three-wheel star (see pages 76/77)

TOOLBOX

Lockable toolbox as attachment for steel cylinder hand trucks (see page 103).
Dimensions L x W X H: 450 x 200 x 150 mm

Type 09051060 for steel cylinder hand truck Type 090 51006

LEATHER WORKING GLOVES

Premium working gloves to protect hands, skin-friendly, CE inspected and manufactured iaw. EN 420 Risk Class I.

Type 00K128 leather working gloves

FORK EXTENSIONS FOR COMBINATION PALLET LIFTER

create an overall length of 910 mm for loading, and facilitate lifting of ½, ¼ and euro-pallets up to 150 kg max.

Type 1171 for Type 04 675 combination pallet lifter (see page 91)

SUPPORTING WHEEL FOR STACKING HAND TRUCKS

adjustable; simplifies moving large and heavy loads

Type 1210 for stacking hand trucks starting at a height of 1400 mm

SUPPORTING WHEELS FOR MULTI-PURPOSE TRUCKS

supporting wheels, retractable; the swivel casters facilitate convenient maneuvering of bulky and heavy goods over long distances.

Type 1211 for Type 634 636 21 hand truck (see page 70)

Type 1213 for hand truck Type 833 820 25 17001 (page 73)

SUPPORTING WHEEL FOR DRUM HAND TRUCKS

adjustable; for easy transportation of large, heavy drums up to 500 kg

Type 1270 for drum handling trucks, Type 3 301 21 and Type 3 307 66 (see page 98)

LOAD AREA WIDENER

Closed aluminium rear panel, side retainer and plastic handle for easy attachment to the electrical stair climber; L x W X H: 100 x 500 x 900 mm

Type 1313 for electrical stair climbers Model 8 051 96 and Model 8 071 96 (see page 75)

SLIDING SKID SET

ideal for loading and unloading from transporters, and as special protection for aluminium skids. The integrated red core of the sliding skid is made from EXLAN plastics and indicates skid wear. Replaced in seconds with the clamp system.

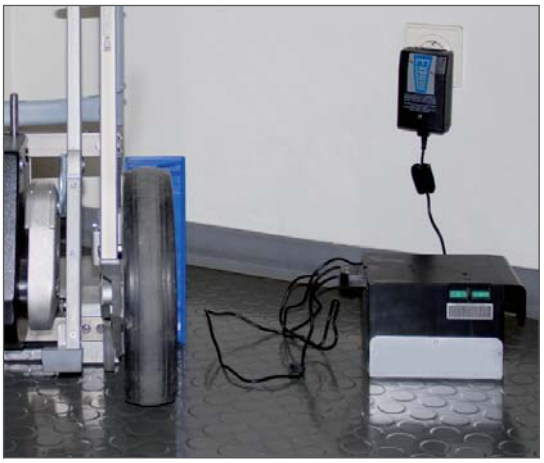

Type 1116 for electrical stair climbers Type 8 051 96 and Type 8 071 96 (see page 75)

BATTERY CHARGERS

for electrical stair climbers
Type 8 051 96 and Type 8 071 96

Type 901 9 345 (240 V) mains-operated charger
Type 901 9 346 (12 V) car charger
Type 901 9 347 (24 V) truck charger

RECHARGEABLE BATTERY PACK

gas-tight rechargeable batteries, easily replaced for continuous operation, sufficient charge capacity (depending on charge) for 30 to 50 floors, dead weight: 6 kg

Type 901 9 344 for electrical stair climbers Type 8 051 96 and Type 8 071 96 (see page 75)

SPECIAL PURPOSE EQUIPMENT – FOUR-WHEELED CARTS WITH TOUCH2MOVE DRIVE

With patented touch2move drive system 140
Application examples 141

PROFESSIONAL USES IN THE OFFICE, SHOP, AND WAREHOUSE

Moving heavy items easily, safely, and quickly: the use of professional, high quality order picking and four-wheeled carts supports and promotes productivity and efficiency when moving goods. Our comprehensive all-inclusive product range provides smooth running, task-specific solutions that are convenient and maneuverable. This contributes towards optimised logistics processes.

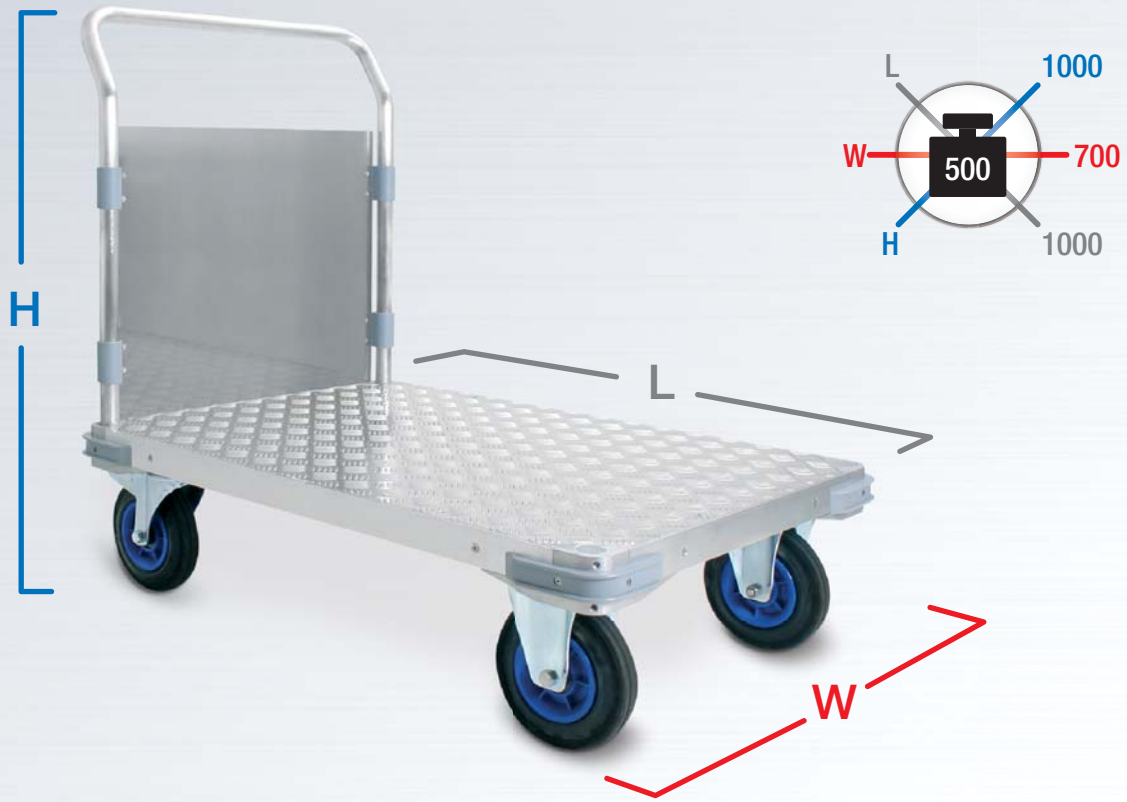

COMPELLING DETAILS – THE MODULAR SYSTEM

Our four-wheeled carts compel with their wide range of application and user-specific features: various heights, weights, and materials, such as steel, aluminium, powder coated or bright galvanized, various load capacities, several shelves, a wide range of load surfaces, end panels, and wire-mesh sides. Storage compartments, writing surfaces, extra shelves, baskets, and a selection of high-quality wheels and castors round out the extensive product range.

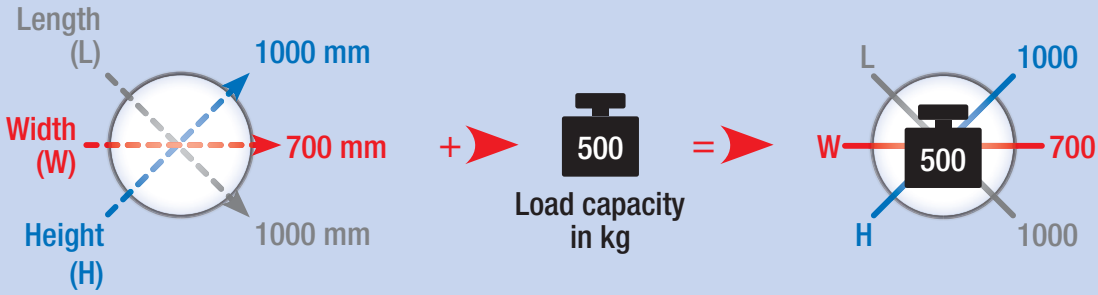

All four-wheeled carts starting at a width of 500 mm can be additionally equipped with the patented touch2move drive concept. You can find more information and application examples about this on pages 140/141.

THE MOST IMPORTANT TECHNICAL INFORMATION PARTICULARLY EASY TO READ IN THE “IN-FOCUS”

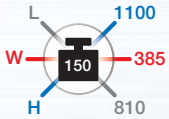

IN-FOCUS CONFIGURATION

The In-Focus shows you the most important technical specifications for various four-wheeled carts at a glance: load capacity, length, width, and overall height. Additional information can be found in the Technical Primer.

Type 90 4870 12 +
Type 90 4871 12 (with rear panel)

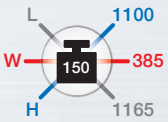

INFO-BOX

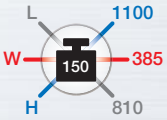

Office carts are equipped with parking brakes on two of the four swivel castors. These correspond to the European EN 1757-3 standard.

Type 90 4877 12 +
Type 90 4878 12 (with rear panel)

Type 90 4872 12 +
Type 90 4873 12 (with rear panel)

Customised configuration of the cart using the modular system: Shelves can be partitioned with separators, and the cart can be equipped with a rear panel. (Fig. Type 90 4873 12)

Office carts with bolted steel tube construction with four non-marking swivel castors, two of which with parking brakes; 50 kg of load capacity per shelf. (Fig. Type 90 4871 12)

SINGLE-HAND TROLLEYS

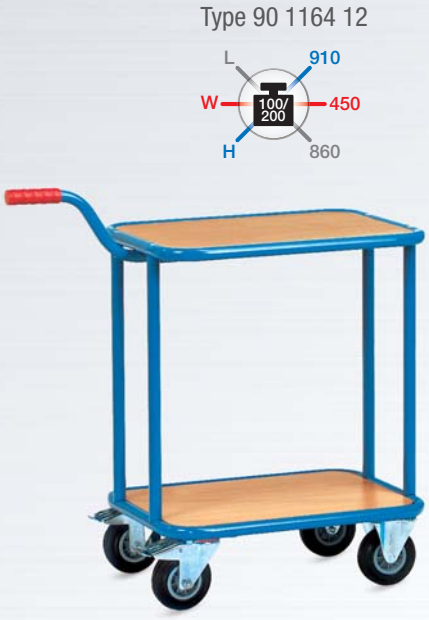

Type 90 1161 12

Type 90 1160 12

Type 90 1164 12

Type 90 1197 12

Small four-wheeled cart with single hand operation for fast small transports up to 250 kg, with solid rubber wheels – two fixed castors and two swivel castors including parking brakes.

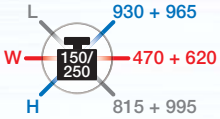

The platforms (600 x 450 mm) are optionally available with tube braces, with welded sheet metal steel, or with wood composite panels inserted into the frame.

INFO-BOX

The push bar is easily and quickly folded onto the platform with the folding mechanism, allowing the transporter to be conveniently stored.

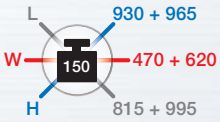

Type 90 505 11 + 90 515 16

Type 90 516 11 + 90 517 16

For quick transportation of loads up to 150 kg at the factory or on the road: practical four-wheeled carts – space-saving and light.

Carts with folding handle are available as steel configuration with wood composite panels, or as an aluminium configuration with five bar sheet-metal panel.

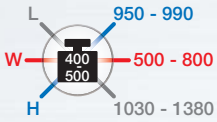

WAREHOUSE & PLATFORM CARTS

Type 90 521 16 - 90 541 20

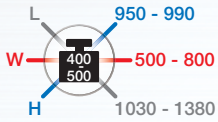

Type 90 522 16 - 90 542 20

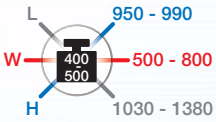

Type 90 523 16 - 90 543 20

Type 90 524 16 - 90 544 20

Rugged companion for order picking tasks: the powder-coated steel tube structure has a permanent surface protection, and is impact and scratch proof.

The modular system makes it possible: depending on the application, four-wheeled carts can be customised with side panels.

Type 90 528 16 - 90 548 20

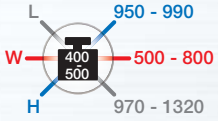

INFO-BOX

Parking brakes on the quality wheels support safe loading and unloading of four-wheeled carts, even on smooth, slippery floors.

Type 90 525 16 - 90 545 20

The quality solid rubber wheels on these four-wheeled carts have hubs with roller bearings. Other wheel versions are shown starting on page 138.

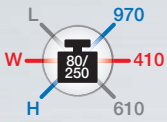

The strong box-frame as 250 mm high side panels, allowing goods to be transported safely. All sides can be individually removed toward the top.

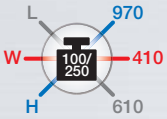

SHELF TROLLEYS FOR EURO BINS

Type 90 135610 12

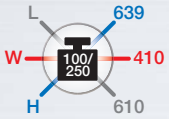

Type 90 135400 12

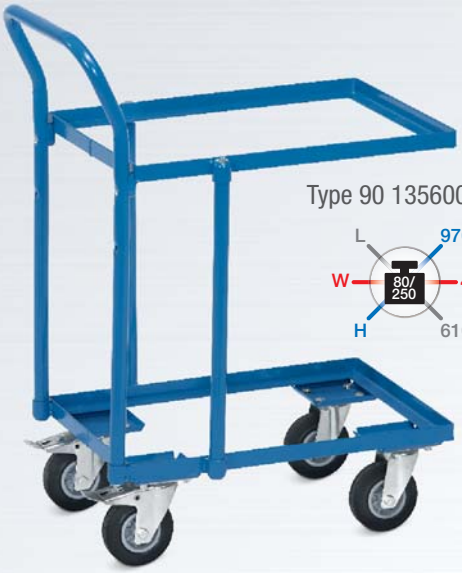

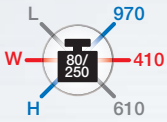

Type 90 13540 12

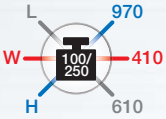

Type 90 135600 12

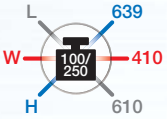

Type 90 135500 12

Type 90 13550 12

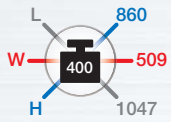

Small shelf carts for Euro bins (600 x 400 mm) with or without push bar and solid rubber wheels, consisting of four swivel castors – two with parking brakes. Delivered disassembled.

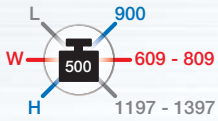

Both shelves are equipped with wood composite panels that are either flush with the frame, or are recessed 10 mm into the frame (except Type 90 135600 12).

Type 90 2400 16

Type 90 2401 20 - 90 742 20

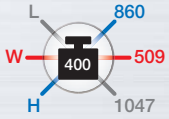

INFO-BOX

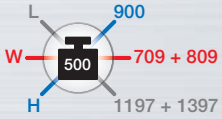

Four-wheeled carts are conveniently maneuvered with the bow handle.

Type 90 2420 16

Type 90 733 20 + 90 743 20

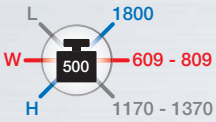

For office or shop use: these table trolleys are optionally available with load capacities of 400 kg or 500 kg. The upper and center load shelves each have a load capacity of 200 kg.

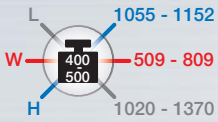

The platforms and shelves of these four-wheeled carts are made from durable wood composite panels with a beech laminate finish.

SHELF TROLLEYS

Type 90 8321 20 - 90 8323 20

Type 90 123 16 - 90 8103 20

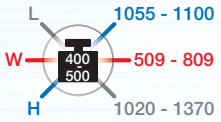

Transporting at many levels: this is handy and has advantages with respect to ergonomics and efficiency of workflows. Each shelf insert has a load capacity of 90 kg.

All shelf inserts of this type series are available with and without side rim. The boxframe with a load capacity of 120 kg is suited to secure sensitive goods during transport.

Type 90 8110 16 - 90 8113 20

INFO-BOX

The end frames are available in three different heights, either open or with vertical risers spaced at approx. 130 mm. Each shelf insert has a load capacity of 90 kg.

Shelf trolleys are ideal companions for distributing office materials. The risers prevent even small packages from sliding through.

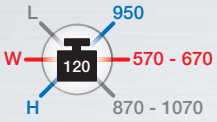

The parking brakes on the quality wheels permit shelf trolleys to be loaded and unloaded safely, even on smooth and slippery floors.

STAINLESS STEEL SHELF TROLLEYS

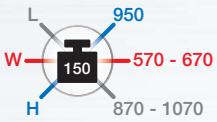

Type 90 5001 12 - 90 5017 12

Type 90 5005 12 - 90 5019 12

Seamless, deep-drawn shelves prevent dirt from collecting in corners and facilitate hygienic cleaning of the service carts. Each shelf has a load-capacity of 80 kg.

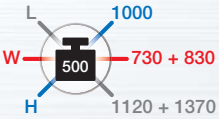

The gray elastic wheels on the stainless steel shelf trolleys are non-marking on sensitive floors. These service carts are available with up to four shelves.

ALUMINIUM FOUR-WHEELED CARTS

Type 910 632 76 + 910 642 76

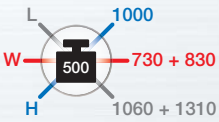

INFO-BOX

These four-wheeled carts have a load surface with the slip-proof five-bar tread. Rounded modular corners with plastic profiles protect interior furnishings against damage. All models are also available with only the push handle, and without walls.

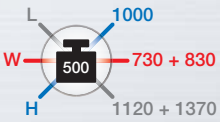

Type 910 631 76 + 910 641 76

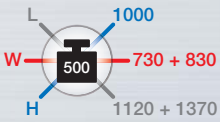

Type 910 633 76 + 910 643 76

Type 910 634 76 + 910 644 76

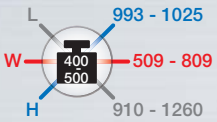

The aluminium four-wheeled carts are equipped with two swivel and fixed castors each. Pursuant to EU standard EN 1757-3, the parking brakes are located on the swivel castors.

Smooth running flat tread wheels provide low rolling resistance. Page 138 also shows this wheel in gray, which can be ordered at no extra charge.

TRANSPORT CARTS

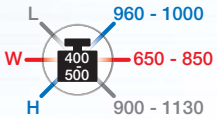

Type 90 1580 16 - 90 1583 20

Type 90 966 16 - 90 967 20

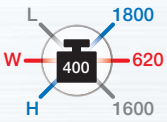

The side handle truck is used to conveniently move and maneuver bulky, heavy goods. The 750 mm high uprights are used as handles in this case.

Moving materials efficiently: these versatile four-wheeled carts use very little space since they can be conveniently nested into each other.

Type 90 4596 20

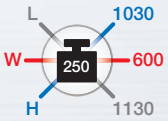

INFO-BOX

The professional handling equipment for any application: tyre trucks starting on page 92 are the ideal equipment to quickly and easily move stacks of tyres.

Type 90 2722 12

The angled supports on this special-purpose cart are suited for picking tyres and wheels, e.g. from the warehouse to the automobile shop.

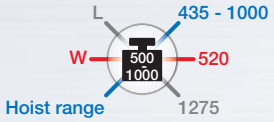

The ideal shop tool: material handling cart with drip tray and flush-mounted grating. This prevents damage, e.g. from dripping oil.

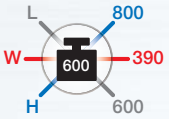

SCISSOR LIFT PLATFORM CART / FURNITURE HOIST

Type 90 6833 10 - 90 6835 15

Type 90 6980 15

For assembling and working at an ergonomic height: The hydraulic pump is operated with the foot pedal. The lowering valve is operated with the hand lever.

Mobile furniture hoist with manual lead screw crank for safe one-man transports of heavy cabinets, boxes, and other bulky goods.

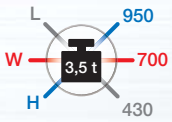

INFO-BOX

Mobile hydraulic hoist for transporting tools, control and steel cabinets, strongboxes, heat pumps, boilers, machinery, housings, wet cells, boxes, etc.

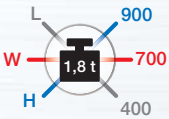

Type 015400

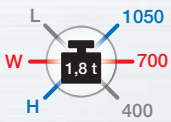

Type 015200

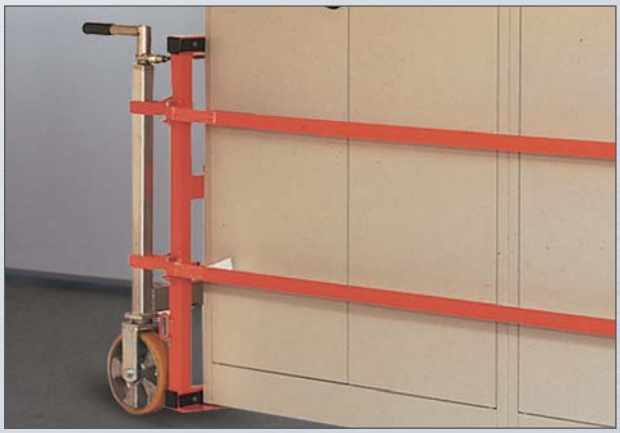

Type 015300

Hydraulic hoist unit with manual pump/relief valve, ball-bearing supported heavy-duty beams with soft polyurethane tyres and direct wheel steering with handles.

This is how it works: The footplate is pushed under the load, the integrated straps are tightened, the load is lifted with pump strokes and moved.

ACCESSORIES FOR FOUR-WHEELED CARTS

PNEUMATIC TYRE WHEELS

Ø 220 mm, load capacity: 400 kg available on four-wheeled carts starting at widths of 600 mm

Ø 125 mm **Type 90 79 98**
Ø 160 mm **Type 90 79 99**
Ø 200 mm **Type 90 79 00**

ELASTIC TYRE WHEELS

with ball bearings

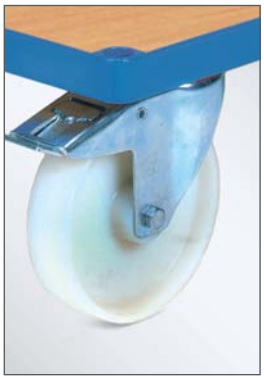

Type 90 12 86 Ø 160 mm
Type 90 79 87 Ø 200 mm

POLYAMIDE WHEELS

high load capacity, smooth running on smooth floors, resistant to moisture, salt, acidic and alkaline solutions

Type 90 79 95 Ø 125 mm
Type 90 79 96 Ø 160 mm
Type 90 79 86 Ø 200 mm

SOLID RUBBER TYRES

blue-gray solid rubber wheels, non-marking, since non-chalking

Type 90 21 85 Ø 125 mm
Type 90 21 86 Ø 160 mm
Type 90 79 73 Ø 200 mm

WHEELS WITH ANTI-STATIC SOLID RUBBER TYRES

electrically conducting (anti-static)

Type 90 79 75 Ø 125 mm
Type 90 79 76 Ø 160 mm
Type 90 79 77 Ø 200 mm

BUMPER ROLLERS

made from light-gray plastic to protect e.g. door frames and furniture

Type 90 79 81 Ø 50 mm

NO. 42 AIRELASTIC FLAT TREAD WHEEL (Ø 200 MM)

with two water and dust-proof grooved ball bearings, light-gray, high elasticity, low-noise, smooth running, good shock absorption, non-marking on sensitive floors – for all aluminium four-wheeled carts on page 133

NO. 76 SMOOTH RUNNING FLAT TREAD WHEEL (Ø 200 MM)

with two water and dust-proof grooved ball bearings, low rolling noise, high elasticity, very low rolling resistance – for all aluminium four-wheeled carts on page 133

ACCESSORIES FOR FOUR-WHEELED CARTS

SWIVEL CASTORS

Four swivel castors*, of which two are equipped with parking brakes; gives four-wheeled carts incredible maneuverability

*2 swivel and 2 fixed castors are standard equipment on four-wheeled carts

Type 90 7988
for all four-wheeled carts (except page 133)

BUMPER STRIP

plastic profile, installed along the perimeter of the base frame

Type 90 7989
for all four-wheeled carts (except page 133)

WIRE BASKET

for bulk materials, color: aluminium-silver, powder-coated, outside dimensions: (L x W X H) 600 x 140 x 200 mm

Type 90 00 90
for all four-wheeled carts (except page 133)

NOTE PAD

wooden, with paper clamp and pencil holder, for all four-wheeled carts (except page 133)

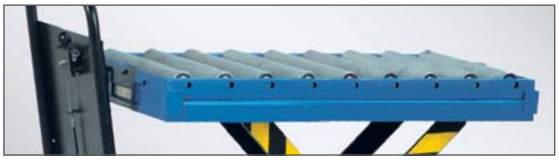

Type 90 1147
(DIN A4 portrait)

Type 90 1148
(DIN A4 landscape)

ROLLER TABLE WITH MOUNTING FRAME

Type 90 68 90 (rigid) for scissor lift platform truck (page 136), powder-coated, with retainer brackets, nine ball-bearing supported steel rollers, Ø 57 mm, length: 430 mm, load capacity: 500 kg

ROLLER TABLE WITH TURNTABLE

Type 90 68 91 for scissor lift platform truck (page 136), rotates by 360°, lockable, six ball-bearing supported steel rollers, Ø 57 mm, length: 430 mm, load capacity: 500 kg, installed on platform with clamp screws

TOUCH2MOVE –
THE PATENTED DRIVE SYSTEM

Thanks to the touch2move drive technology, logistics operations are optimised, and transporting heavy goods is not only more efficient, but also significantly safer. Simply by touching the sensor handles, the vehicle “obeys” the operator‘s natural movements, and automatically adapts to his/her walking speed. Heavy loads are moved safely and ergonomically without effort – and the operator needs neither a driving license nor any special training.
The touch2move drive concept can be fitted to practically all four-wheel trolleys and other transport carts – it also complies with Safety at Work Regulations, and has the CE mark.

Every touch2move drive system is designed and built by our experts in close cooperation with the end user. EXPRESSO‘s handling consultants first examine and discuss the task on your premises, and then prepare an individual handling analysis. Within a few days, you will receive a detailed offer for the corresponding handling concept.

(Excerpt from our EXPRESSO Competence Catalog for powered goods handling and transport technology)

CENTRAL DRIVE UNIT WITH TWO MOTORS

Application area: Industry

Combines the manoeuvrability of a central drive unit with the extra power of two motors.

SHELF TROLLEY

Application areas: Offices, warehouses

Steel structure with shelves of derived wood; also as wire-mesh cart or cabinet trolley.

SCISSOR-LIFT PLATFORM

Application area: Industry

For transporting loads and for use as mobile workplace.

LOW-SIDED BOX CART

Application areas: Industry, warehouses

For uneven surfaces, e.g. paved or cobbled floors.

OUR COMPETENCE CATALOGS

EXPRESSO – YOUR COMPETENT PARTNER FOR TRANSPORTING, LIFTING, AND MATERIAL HANDLING

EXPRESSO is a premium manufacturer for industry, logistics, and commerce. In addition to universal brand-name products with a world-wide track record, we also supply unique, customised solutions for all applications wherever goods are moved and transported.

Our products/services are split into three product segments, which we summarized for you in our respective competence catalogs. Feel free to request informational material, or visit us at our online info center "www.expresso-group.com".

CLASSIC: MANUAL HANDLING EQUIPMENT

Here, you can find intelligent products that simplify your manual tasks, and make handling and moving loads safer, less strenuous, and more efficient. These include:

Hand trucks
Handling equipment
Four-wheel carts
Accessories

DYNAMIC: POWERED HANDLING SYSTEMS

This catalog includes driven solutions designed to lift, handle, and move goods of all types.

lift2move
Multi-Performance Lift
BalanceLift Systems
touch2move drive system
LEO tug

LOGISTIC: LOADING TECHNOLOGY

Our extensive loading technology product range provides everything that makes loading and unloading of vehicles possible, simpler, and safer. Here you can find products to be brought along in vehicles, as well as dedicated building solutions regarding the topics:

Ramp safety
Loading equipment
